

THE GREAT GREEN MACAW PROJECT

With less than 400 of these majestic birds left in the wild, the Great Green Macaw Project is the progressive next phase of the highly successful Just One Tree program. We planted more than 10,000 Almendro trees! Critically endangered Great Green Macaws nest almost exclusively in the Almendro tree, and rely on this keystone species for their survival. Our goal is to develop a very important breeding and release project.

WHAT DO WE PLAN TO DO?

- build a breeding facility
- acquire 4 pairs of rescued macaws
- start our captive breeding program
- help them be released into the wild

HOW CAN YOU HELP WITH THE PROJECT?

\$10,000 – DIAMOND

center aviary named in your honor

\$5,000 – PLATINUM

1 breeding enclosure or 1 pair of Great Green Macaws named in your honor

\$1,000 – GOLD

\$500 – SILVER

\$250 – BRONZE
